1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 22:

line 2, "differential clock circuitry" has been changed to --first and second differential clock circuitries--.

The changes have been made to provide proper antecedent basis for the first and second differential clock circuitries as recited in claim 21.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest second sampling circuitry invertedly connected to the data input and connected to the data output for the second duration to provide the second data bit inverted to the data output and holding circuitry connected to the data output for the second duration whereby the holding circuitry holds the first data bit and the second sampling circuitry connects the second data bit inverted to the data output to enhance the held first data bit when the first and second data bits have different states as called for in claims 1, 11 and 21. Therefore, claims 1-26 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
